## YOUR WASTE MANAGEMENT CHALLENGES

**It's clean, it's innovative and it works!**

EnviroWirx is a 7.5yd., semi-underground waste container manufactured and distributed in North America. It was designed to solve the common problems associated with traditional waste containment, removal, and management.

Proven successful in property management, fast food, strip mall and parks and recreation applications, EnviroWirx is a perfect fit for existing real-estate as well as new construction.

### COLLECTION SIMPLIFIED!

*With EnviroWirx,  
the driver never  
leaves the truck or  
handles the  
container.*

*Empty in 2 min.*

- 1 Driver approaches the and inserts front forks through the steel handles.
- 2 Driver lifts straight up until bottom of EnviroWirx is clear from the liner.
- 3 Driver continues to lift while tilting the forks in the normal lifting procedure.
- 4 Driver tips and dumps the bin slowly, allowing gravity to empty the waste.
- 5 Driver returns EnviroWirx to the upright position and places it back into the inground liner.

# Save Space

42% of EnviroWix is underground and **out of sight**

EnviroWix **can be installed in visible areas** designated as undesirable for steel bins

EnviroWix **holds more waste** in a **smaller footprint** than a standard steel dumpster

EnviroWix **does not require** a fenced enclosure or roof

# Save Money

EnviroWix can be **picked up by any hauler** with front forks, giving you the competitive advantage to shop for a waste hauler that meets your needs and budget. You can continue with uninterrupted service using your existing carrier.

It has a **payload of 3,300 lbs**; holding more means fewer bins and less frequent pick ups.

EnviroWix **does not require replacement bags, liners, or parts**, meaning no future expenses or unexpected costs.

# Improve Appearance

EnviroWirx holds waste underground where temperatures are cooler in the summer and warmer in the winter. Cooler sub-surface temperatures reduce odor emission. Warmer sub-surface temperatures mitigate freezing.

Aesthetically pleasing, EnviroWirx can be located in high visibility areas, minimizing dumping of unwanted items.

The unique concave ridge surface container is a deterrent for graffiti and spraypaint vandalism.

EnviroWirx can be installed in a few hours and used immediately. Install yourself or use our installation service.

EnviroWirx has a secure lid designed to keep wildlife, from raccoons to wasps, out of the unit.

# 4.5 Yard Version

Same advantages of the 7.5 yd. bin:

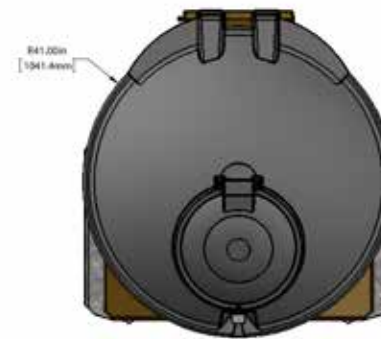

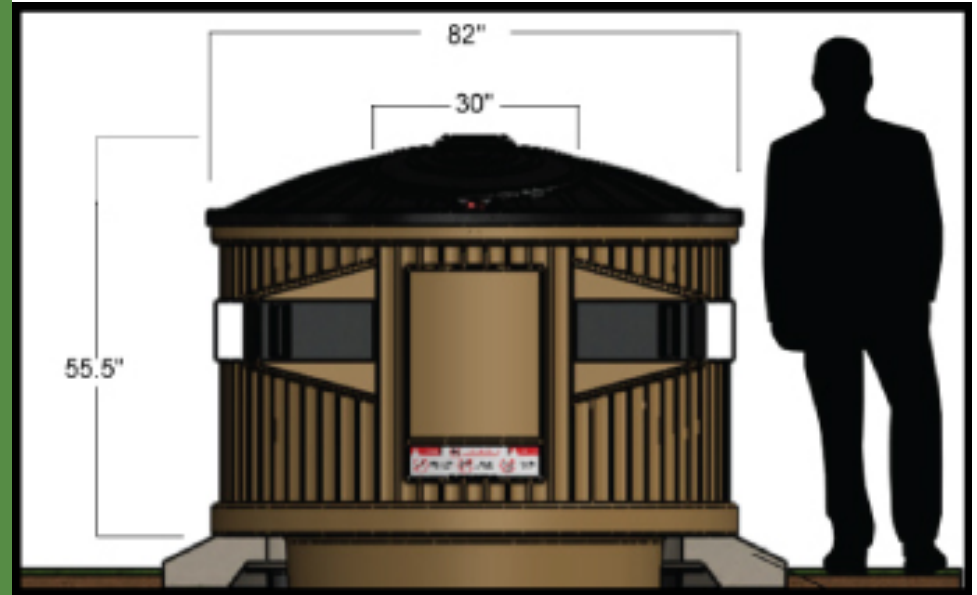

- Save Space
- Save Money
- Improve Appearance

*No excavation required!*

The 4.5 yard EnviroWirx waste container rests on a concrete ring (included), meaning you don't have to worry about digging down like with deep waste bins.

Not only does this convenience provide you the savings of excavation and installing barriers, it also allows you the option of placing your container wherever you please!

4.5YD SURFACE MOUNTED SHOWN WITHOUT CONCRETE RING

# Weight Estimates

## Reference Only - 7yd<sup>3</sup> of same material

Aluminium Cans - uncompacted

50lbs / 23kg

Aluminium Cans - compacted

1,400 lbs / 520 kgs

Broken Down Boxes

1,050 lbs / 475 kgs

Commercial / Industrial Waste - uncompacted

3,150 lbs / 1,430 kgs

Glass

3,500 lbs / 1,590 kgs

Leaves - compacted

3,150 lbs / 1,430 kgs

Loam (compost)

15,120 lbs / 6,860 kgs

Mud (very wet compost)

20,790 lbs / 9,430 kgs

Newspaper - loose

2,800 lbs / 1,270 kgs

Residential Waste - uncompacted

1,400 lbs / 635 kgs

**Average pick up weight per yard:  
(standard number used by haulers)**

**110 lbs/yd<sup>3</sup>  
50 kgs/yd<sup>3</sup>**

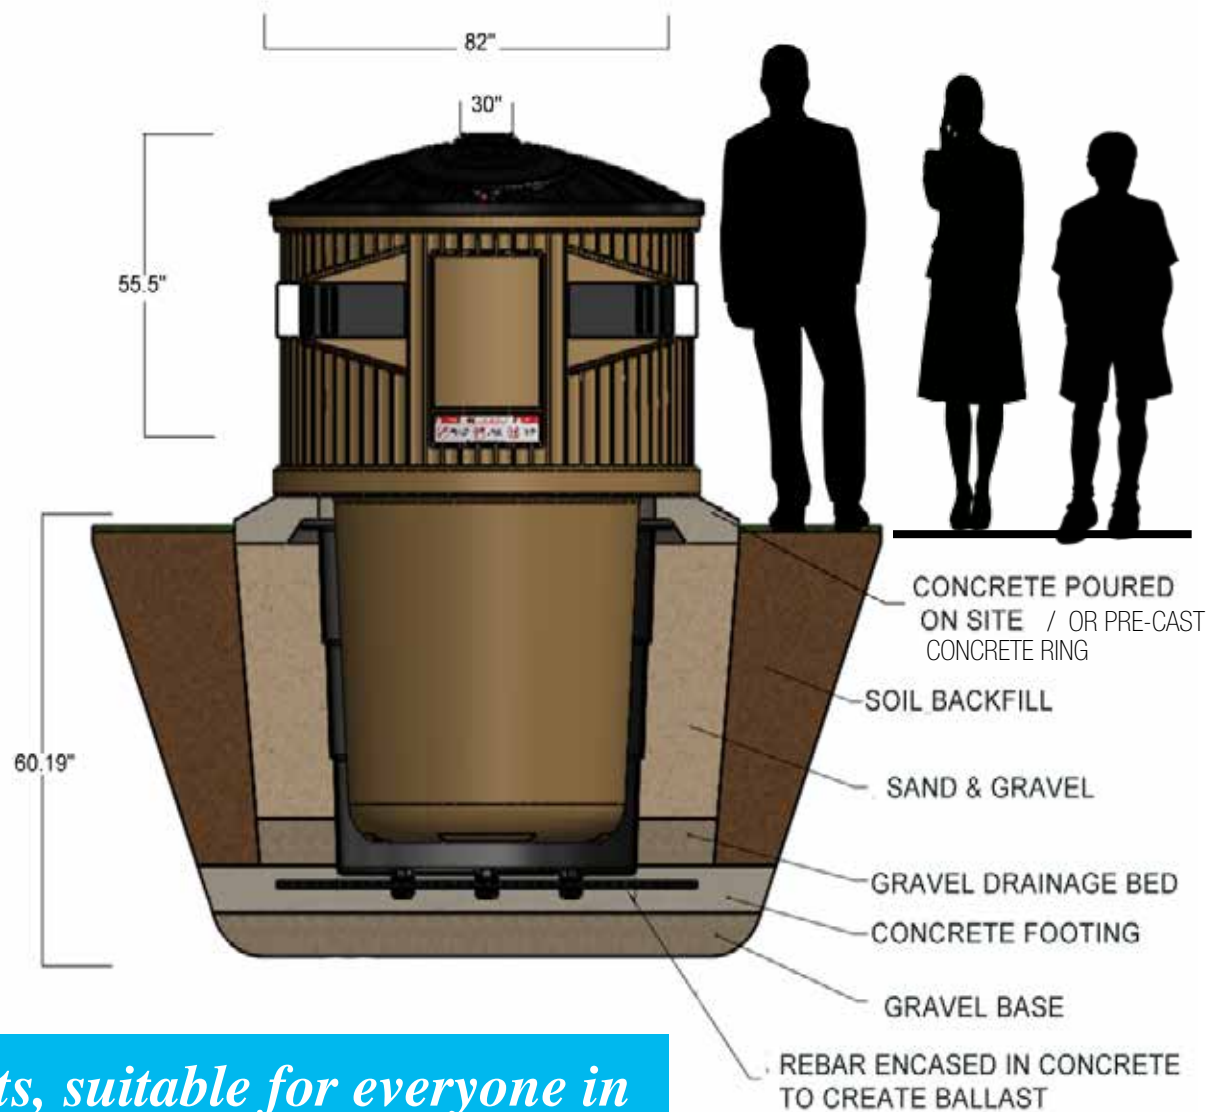

***Average pick up weight per yard of  
an EnviroWirx 7yd<sup>3</sup> bin is:***

**770 lbs/yd<sup>3</sup>  
350 kgs/yd<sup>3</sup>**

# Measurements

*Low fill heights, suitable for everyone in the family to use safely and comfortably*

# Options

## EnviroWirx Colors Available:

Green

Oak

Graphite

\*Additional custom colors available upon request.

## Gravity Lock

The Gravity Lock works to prevent animals and insects from getting inside the container. When the container is emptied, the lock disengages and opens the lid.

## Gas Shock - Assisted Lift

The Gas Shock holds the lid open continuously for ease of accessibility while depositing waste.

## Lid Options

### Garbage Lid

Our standard Garbage Lid comes equipped with retraction strap to pull the lid closed after use. It works with tension to ensure a snug closure.

### Cardboard Lid

The Cardboard Lid is slotted for cardboard waste. Simply fold the cardboard and slide it through the slot.

## Available Signs

Choose from these four standard signs to properly label your bin:

\*Custom signage available upon request.

# Site Furnishings

Choose from a variety of other solutions for your waste containment needs.

## EnviroWirx Tote Locker

This attractive locker is ideal for securing your bins from the elements and animals. It also works well as a storage cabinet, complete with a locking handle.

### Tote Locker Accessories:

#### Grease Barrels

50 Gal steel drums for storage and recycling of food grade grease.

#### Recycling Totes

96 Gal plastic totes on wheels for waste and recycling use.

## RTS Garbage Can

High volume garbage can, allowing for more time in between emptying. Comes with a removable lid and drop-in black liner for ease of use. You can also purchase the lid separately - fits regular 50 gal steel drums.

## Custom Molding

Need a custom molded product? From start to finish, our team will work with you on the design, engineering and production of your product. Whether it's customizing with your logo and colors, or creating a new product, we're here to help!
